- AN - 1997-301394 [28]
- TI - Fitting structure of seal member - is integrated with protruded member of which tip has wide head, including narrow opening of fitting recess which resists removal of protruded member
- AB - J09112699 The seal member (20) is integrated with a protruded member (22) of which tip has a wide head. An item to which a seal is fitted has a recess to be engageable with the protruded member. A narrow opening (17A) of a fitting recess resists the removal of the protruded member (22).  
- USE/ADVANTAGE - For prevention of seal member removal. The seal member is rigidly fixed.(Dwg.2/8)
- IV - FIT STRUCTURE SEAL MEMBER INTEGRATE PROTRUDE MEMBER TIP WIDE HEAD NARROW OPEN FIT RECESS RESIST REMOVE PROTRUDE MEMBER
